

# Fire Protection Services

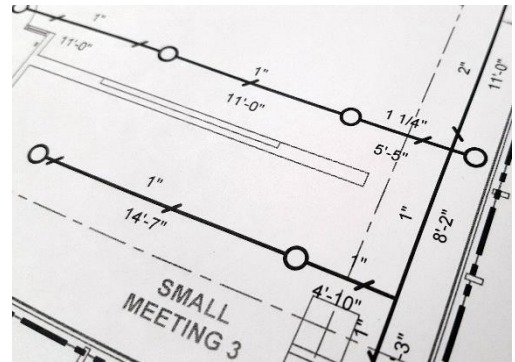

## WHAT WE DO

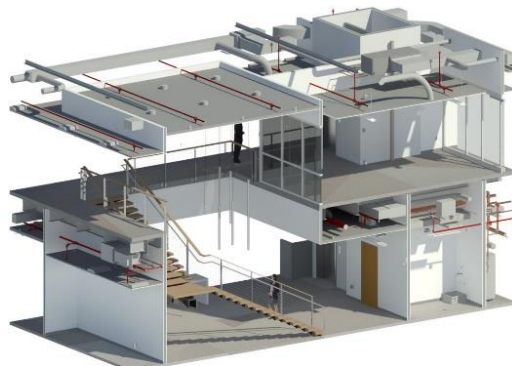

- Clean Agent System Design
- Code Reports & Life Safety Plans
- Fire Alarm & Mass Notification Design
- Fire Pump & Storage Systems
- Fire Sprinkler & Standpipe Design
- Hydraulic Calculations
- Installation (Shop) Drawings
- Smoke Control & Fire Modeling
- Stock & Fabrication Listing

## UNIQUE TO SSC: SHOP DRAWING & UPFRONT DESIGN

We specialize in fully-engineered design which includes all piping designed and coordinated alongside hydraulic calculations which creates a comprehensive design package that has saved considerable overall cost and time across multiple projects. We design both for architectural packages as well as for contractors in shop drawing submittals.

## WHY USE SSC FOR FIRE PROTECTION

Our fire protection team not only has a variety of fire protection experience, but we use industry-leading fire protection tools, all in Revit, to design systems. As a result, we readily coordinate across other disciplines, render in real-time, and produce at speeds similar to or faster than traditional 2-D CAD drafting.
